**Concepts**

The Stakeholder Advisory Committee recommended that two concepts that add a new northbound lane over the Slough and change traffic flows on 1<sup>st</sup> and 3<sup>rd</sup> streets be studied further. **After looking at Concept C3 (two-way traffic on 3<sup>rd</sup> Street between Main and Pacific avenues) and Concept C4 (two-way traffic on 1<sup>st</sup> Street between Main and Miller avenues and two-way traffic on 3<sup>rd</sup> Street between Main and Pacific avenues), do you think each concept should be studied further?**

## Street configuration on Main and Pacific avenues

There are three possible street configurations for Main and Pacific avenues that widen the travel lanes to improve safety for people driving, biking or parking. Different options could be considered for Main and Pacific avenues. **What do you think about each option?**
